SUMMARY

Full-stack web and mobile developer and Computer Science senior with hands-on experience delivering end-to-end applications using TypeScript, React, Node.js, Python, relational databases, and cloud platforms including GCP and AWS. Experienced across enterprise fintech and product engineering, with a strong drive to build scalable products, tackle meaningful challenges, and create technology that delivers real-world impact.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Python, Java
Frontend	React, Next.js, Tailwind CSS
Mobile	React Native, Flutter
Backend	Node.js, NestJS, Express.js, FastAPI, Spring Boot, REST APIs
Databases	PostgreSQL, MySQL, Supabase, Firebase, Prisma
DevOps	Google Cloud Platform, AWS (EC2), Docker, GitHub Actions, Vercel

EXPERIENCE

Full Stack Developer

Jan 2025 – May 2026

SAMAHAN Systems Development (SYSDEV), Ateneo de Davao University

- Led university-wide system projects, owning both server-side and client-side development of scalable APIs, responsive interfaces, and end-to-end features.
- Built and maintained API integrations across internal systems to streamline operations.
- Mentored junior developers on API design and data-fetching patterns.

Web Developer Intern

Aug 2025 – Jan 2026

Symph

- Developed and maintained web application features that improved user experience and engagement.
- Implemented Google Cloud solutions to streamline build and deployment workflows.

Backend Developer Intern

May 2025 – Jun 2025

Orange & Bronze Software Labs, Inc.

- Optimized backend performance and reliability for enterprise-grade software in a fintech environment.
- Applied industry best practices for enterprise-level development under senior engineer guidance.

PROJECTS

MoneyApp — Personal Finance Web App

Jan 2026 – May 2026

Expense tracking, group bill splitting, payment confirmation, debt-tracking dashboard, friend management, and Google OAuth authentication.
